The Scientific Method	
Ask a Question	What do I want to learn about? I wonder what would happen if…
Make a Hypothesis	If… then… because… *Answers your question
Conduct an Experiment	Test your hypothesis by making a plan and follow the procedure. *Observe and Record
Analyze your Results/Data	Display data gathered during experiment in a chart, graph, picture, written words
Draw Conclusions	Was your hypothesis correct? What did your data show you?
Report your Findings	Share your observations, results and data, and conclusion. Share your procedure for others to test.
